

Mr Cullen from British Telecom came to visit Mrs Griffiths- Hawthorne's class to talk about STEM. We learned about algorithms by following instructions to make a crazy character. Mrs Griffiths- Hawthorne had to draw a crazy character by following the children's algorithms. Next the children wrote algorithms for their partners to draw a crazy character. We discovered most of our friends didn't draw our character correctly because we didn't write enough information in our algorithms. We then added more information to the algorithms and our friends drew our crazy characters more precisely. We are fantastic at writing algorithms and de-bugging in P3G-H.
